

Laboratory Information System (LIS) Upgrade

Laboratory Information System Upgrade occurring this weekend.

Pathlab, in conjunction with our laboratory system suppliers Sysmex NZ, will be upgrading the laboratories information system over the weekend of the 22nd of November.

The upgrade is part of the continuing work we are doing to provide an efficient, reliable, quality laboratory service to you and to our communities.

We have proven plans for a smooth transition from the old system to the new system and these plans should ensure that there will be no effects on the levels of service we provide to you.

If you have any queries or concerns with this, please do not hesitate to contact me on 07 858 0795.
